As a matter of fact, it is saying that, the main raw material (fabrics, machineries, accessories) of garment industry, which is at the top of the export trade of Bangladesh, comes from abroad. Its cutting, making, and sewing parts are done in Bangladesh. This industry is just standing on the basis of low wages for labor. On the other hand, the main raw material of Bangladesh's leather industry is leather is from Bangladesh. Its texture & Quality are the top class in the world. The majority of which is exported as raw leather in abroad. But if the leather by-products such as shoes, bags, garments and other leather products could make in Bangladesh and could export in abroad, the leather sector could has been rich in multiples and it played a huge role in the national economy as a permanent industry of Bangladesh. With the exposure of the world's most modern products & technology, our products & technology will become more modern & technologically advanced & its international market will also be expanded.
